## **Viridor Recycling Facility**

**Bargeddie, Glasgow**

CM Steel Buildings were appointed as main contractor to rebuild a site that gained national news coverage when it was subject to a catastrophic fire. Due to the location of the recycling facility the smoke from the fire forced the closure of a section of the M8 motorway until under control.

CM's mandate was to reintroduce perimeter reinforced concrete push walls incorporating a concrete slab as well as associated open fronted canopy steelwork and cladding.

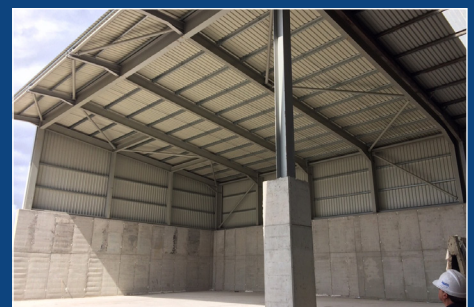

CM received strong commendation from all parties involved for their timely build time to allow the facility to reopen ahead programme.
