

Glenalmond Investments

Bankhead Medway, Sighthill

CM Steel Buildings were appointed as Main Contractor by the head of Glenalmond Investments Mr Mark Wallace to undertake these 8,700ft² unique trade counter units with an additional 4,000ft² being achieved through the introduction of a structural steel mezzanine level.

Mark had undertaken several developments in the area but chose CM Steel Buildings through their unique and progressive attitude for what was a challenging development.

The development was subject to a large cut exercise as well as introduction of a large retaining wall consisting of water proof concrete. The existing services had to be managed with care and sensitivity due to their close proximity and to maintain supply to neighbouring businesses.
