

ECON Engineering Limited

Alloa

CM Steel Buildings were appointed as main contractor for this development to give ECON Engineering Limited a Scottish Headquarters.

The project consisted was a mix of both 2 story offices along with a state of the art HGV workshop and extensive yard area.

The workshop had 2No inspection pits for the Engineers to carry out all aspects of keeping the gritter trucks on the road.

The building was insulated to the highest standards along with the most modern of fittings and fixtures.

The full project was completed in 6 months allowing ECON to meet the winter weather needs for the whole of Scotland.
